

New & Exclusive to Sussex Permanent Makeup

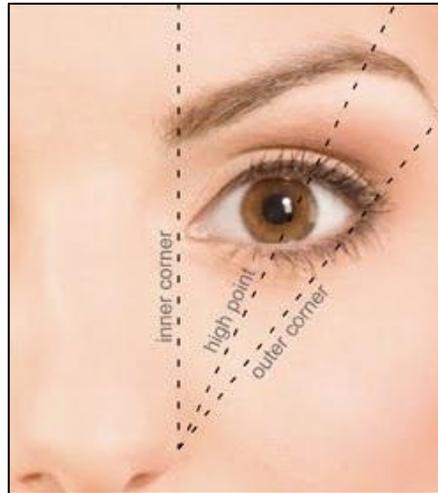

Beautiful and Natural Looking Eyebrows just for you Blonde's!!

By Katy Jobbins

**Head Trainer Permanent Makeup Training Academy,
Sussex Permanent Makeup & Harley Street
Permanent Makeup**

Blondes have more fun, but not when it comes to drawing their eyebrows on!

Natural blondes truly do understand the frustration of trying to re-define, fill in sparse areas or completely correct the shape of their very light eyebrows without looking like a clown!

Thick, dark and super defined eyebrows like Megan fox's may be featured regularly in magazines, catwalks and on the television

& they are favoured by some of Hollywood's most beautiful movie stars– but it isn't a look that suits an everyday natural blonde.

Even some of the most expensive eyebrow pencils, paints and powders on the market today are way too dark and can look quite unnatural. This makes drawing your eyebrows on not only very difficult, but also quite daunting.

GOOD NEWS!!!

**...I have spent years developing a new
permanent brow enhancement technique...**

...exclusively for blondes!

Using only the natural simulated hair stroke effect, alongside a bespoke marbling service, I am now able to create multi-tonal colours designed specifically for blondes. It's almost like highlights for your eyebrows!

This new technique guarantees a completely natural, perfectly defined result for those with blonde hair.

My new and exclusive multi-tonal marbling treatment adds definition to the eye area, whilst perfectly re-shaping your eyebrows using the best quality (the same pigment that Harrods technicians use) natural, hypo allergenic and organic pigments to match your exact hair colour. All our pigments are designed to fade over time so as your hair colour changes, so can your eyebrow colour.

For this technique, I match two or three tones in your own natural hair colour to our permanent make up pigment.

I will then use a marbling pallet designed with colours, just for you, creating a blonde base and then at random implanting all the colours of your hair. My method is to *'air on the side of caution'*, so I always intentionally start with too light a colour.

“It’s easy to add more colour at the top up stage. It’s much harder to take it away.”

You return to me in 6 to 12 weeks so I can check that the shape and colour have healed in perfectly. At this appointment I will add lowlights of a slightly deeper colour creating a 3D natural hair stroke effect for very fair hair.

**There is no extra charge for this top up
appointment**

My exclusive new treatment has been extensively trialled, with huge success.

To see exactly what my clients think of their new eyebrows visit:

& click play to hear what they think.

So, what kind of result can you expect?

Take a look at the 3 beautiful blondes on the front cover of this report.

Hollywood superstar Cameron Diaz, 'Britain's Got Talent' star

Amanda Holden and Friends favourite Jennifer Aniston, who all boast perfectly natural and defined eyebrows that match their golden hair.

Save yourself 20 minutes every day drawing in your eyebrows & making sure they are even. Never have the worry about rubbing your brows off in public again & smearing them across your face.

– They will simply look perfect and natural day in day out!

Your new eyebrows will be so light that only you will know your new secret!
